01 PROFILE

Every hour of my life I am dedicating to a successful career in Web Development, and the company that will hire me will be profitable.

On July 11 1996, I was born in Republic of Moldova, in a post Soviet Union country from eastern Europe. My integrity begins at age fifteen when I left my village for a better life. High school I completed in my Country. Then, due to my excellent grades I obtained a scholarship in a Europe Union Country, Romania, so I went there to study Construction Car Technology at University of Petrosani. In 2017 before completing my Bachelor Degree I obtained an Erasmus+ scholarship, so I went in the Spring of 2017 to Warsaw, Poland, where I practiced my engineer knowledge. In summer of 2017 after I obtained a student Visa I came to the United States.

02 EMPLOYMENT HISTORY

Jun 2019 — Present

Columbus

INFORMATION TECHNOLOGY SPECIALIST at Spectrum

As a contractor in the Information Technology field, I am installing internet, phone, and TV services to the residential customers. My purpose at this job is to work on correct distribution of the signal to the devices, and after installing the services, to present new services to the new customers. At this job, I learned how to work in the settings of any Spectrum devices designed for residential installation; also, I learnt working with the different kinds of signal that flow through Spectrum Coaxial Network.

Jun 2018 — May 2019

Columbus

DIRECT SALES REPRESENTATIVE at Spectrum

In January 2019 and February 2019 I was two times employee of the month by having the most sales from around 100 salesmen. As a Direct Sales Representative I was selling Spectrum Services as Internet, Telephony, and TV Services door to door. Through this job I got excellent communication abilities, and I learnt to effectively work in a big team by sharing ideas and by helping each other. The reason why I started this job was the dream that I got when I was in Moldova. At that time I read many American books in which I found that in the U.S. through sales is possible to move from "rags to riches." I was searching the American dream, and after six months of hard work I got at the top of this field where I understood that direct sales is not actual anymore because of the presence of Internet advertisement. Then, in June 2019, I switched the job in the same company to a more technical one "information technology technician."

Oct 2016 — Jan 2017

Petrosani, Romania
